### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: claim 1 is patentable over the prior art of record because of the specific image forming apparatus, which includes  $n$  independently driven light sources, a scanner unit causing the  $n$  light beams emitted from the light sources to perform scanning on a photosensitive member in the main scanning direction, a moving unit causing the  $n$  light beams to scan on said photosensitive member in the sub-scanning direction by moving the photosensitive member, a controller controlling the scanner unit and/or the moving unit such that the main scanning line is subjected to overlapped exposure  $k$  times by different light beams, said controller having at least a first mode in which  $k$  is set to  $k_1$ , and a second mode in which  $k$  is set to  $k_2$ , where  $k_1$  is different from  $k_2$ , and wherein  $n = i_1 \times k_1 = i_2 \times k_2$ , where  $i_1$  and  $i_2$  are natural numbers, and where  $k_1$  and  $k_2$  are natural numbers equal to or larger than 2, and a modulator that modulates the respective light beams so that dot strings formed by the light beams are shifted by a distance of  $d/k$  in the main scanning direction, where  $d$  is an interval between dots formed by one light beam. The combined limitations as currently claimed are not taught by the prior art of record considered alone or in combination.

Claims 2-4 are allowed because they are directly or indirectly dependent from claim 1 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
